

OPTTA Emergency Spills Training
Town of Greater Napanee Fire Station, 3266 Hwy 41, Roblin
Tuesday June 4th, 2019

Space is limited. Register Early. Please complete one form per person.

This ½ day program instructs petroleum transporters, distributors and their drivers, the proper emergency response when an accidental release of petroleum product occurs. The seminar reviews the requirement of an Emergency Response Program, spill kit components and clarifies the correct actions and steps commonly found in most company's ERP. Additionally, it provides hands on instruction where drivers respond to live scenario exercises using common sorbent materials, with training that assists with the understanding of which product is best for each application. Also included in this session, is instruction on the practical use and proper deployment of a dry chemical fire extinguisher.

Classes are limited at 12 participants to ensure excellent trainer to student communication and interaction.
